

DIVYANSHU VERMA

Data Scientist

9795352650 | Divyanshuverma111@gmail.com

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

SKILLS

Programming & Core Concepts: Python, SQL, Object-Oriented Programming (OOP), Data Structures

Data Science & ML: Pandas, NumPy, Scikit-learn, Feature Engineering, Model Evaluation, Deep Learning, NLP

Data visualization & Analysis: Matplotlib, Seaborn

Framework and Developer Tools: FastAPI, Streamlit, Django, Flask, Docker, Kubernetes, Git, CrewAI, Generative AI

EXPERIENCE

TAVANT TECHNOLOGY (12/2024 - present)

Junior Data Scientist

OpsPilot Accelerator – Enterprise AI ITOps Automation Platform

- Built a **multi-agent AI automation system** using Python, CrewAI, and AWS Bedrock (Claude) to process **100+ IT support emails/day**, reducing response time by **49%**.
- Optimized data quality for **RAG pipelines** by performing **EDA** and **preprocessing** on unstructured IT support data, ensuring high-fidelity retrieval from **AWS Bedrock Knowledge Bases**.
- Implemented **ML classification** and **NLP** sentiment analysis using Python, improving automated incident triage efficiency.
- Integrated **Microsoft Graph**, **Jira REST API**, **MongoDB**, and **ELK**, deploying via **Dockerized MLOps on AWS ECS, Lambda, and S3**.

Software Engineer Trainee

- Applied machine learning techniques including classification models, feature engineering, and model evaluation for automated ticket triage.
- Developed a **data science code-generation agent using CrewAI**, integrating **Azure OpenAI** and **MCP (Model Control Protocol)** for dynamic tool orchestration and workflow automation.
- Built an **MCP server for efficient data retrieval from AWS S3** and integrated it with CrewAI to enable dynamic access to server-hosted tools.
- Implemented a **Streamlit-based full-stack application** with **GitHub automation** and performed **high-precision image segmentation using SAM and Samurai models**.

NOKIA (08/2023 - 05/2024)

Student Intern

- Developed Flask APIs and streamlined deployment processes using Docker containerization.
- Deployed scalable applications leveraging Kubernetes for efficient resource management.
- Optimized application performance by implementing concurrent programming in Golang and Python.
- Streamlined development workflows and reduced deployment time through CI/CD pipelines.

EDUCATION

Vellore Institute of Technology

M.Tech in CSE with specialization in AI/ML; CGPA: 9.11

Ajay kumar garg engineering college

B.Tech in Mechanical Engineer; CGPA: 7.99

Vellore, Tamil Nadu

June-2022 to June-2024

Ghaziabad, Uttar Pradesh

June-2017 to Sep-2021

PROJECTS

Fruit classification using HSI with help of Convolutional neural networks: [Link](#) (11/2022 - 01/2023)

- Built a CNN-based deep learning model using Python, OpenCV, and TensorFlow to classify fresh and rotten fruits, achieving **92% accuracy using batch normalization and data augmentation**.

Image classification using CNN and ensemble learning: [Link](#) (03/2023 - 07/2023)

- Built an **ensemble image classification pipeline** using Python, TensorFlow, and Scikit-learn.
- Improved model reliability by **reducing false positives by 20%** using stacked models.
